GLEBE FARM HEDGING

Langham, Colchester, Essex. CO4 5PP

Welcome to our 2011-2012 catalogue and thank you for showing an interest in our range of hedge plants and young trees.

Glebe Farm Hedging is a family business, run from our farm on the edge of the Dedham Vale in the heart of 'Constable Country'. Our many clients include estates and farms, local authorities, landscapers and developers, and private owners of gardens both large and small. The majority of the plants we offer are supplied as young, dormant, bare-rooted transplants which are lifted and despatched between late October and early April, many of these are native species. Pot grown plants are normally available all year round, and for those wanting a more instant effect we also list a number of larger field grown plants for Autumn/Winter planting. In addition we carry a wide range of planting accessories to protect young plants and assist establishment.

From September you can order online at www.hedge-plants.co.uk - but if you would rather talk to us, please ring to discuss your requirements, or you can simply fill out the detachable order form at the back of this price list, then post or fax it to us. Plants are lifted and packed to order - lead time is usually around 4-7 days, but at busy times may take longer. We will always confirm your order and delivery date in writing or by telephone. Most orders are sent by carrier on a nationwide next day service to ensure that plants reach you in the peak of health. Local customers are welcome to collect pre-booked orders. All plants are despatched with planting and aftercare instructions, and are guaranteed for the first growing season (see terms and conditions for details). For further information, advice and customer testimonials please refer to our website.

At Glebe Farm, we pride ourselves on the value, quality and performance of our plants and the service we offer. We understand that planting hedges and trees is a considerable commitment - often carried out for the benefit of future generations - and we take great care to select and pack only the best plants available to ensure success. If you are unsure which species to plant, how many plants you will need or have any other questions, please get in touch - as horticulturalists with over 20 years experience we are always happy to help.

Yours sincerely,

William Baird, Managing Director,
Glebe Farm Hedging.

Glossary of Terms used in this list.	Metric converter	
Sd= Young bare-rooted seedlings (1 year old plants), offering great value for money especially for larger planting schemes.	8-10cm = 3-4ins	40-60cm = 16-24ins
Tr= Bare-rooted transplants, lifted as seedlings and spaced out in the field for a further year or more to allow roots and branch systems to develop. Most plants we list are 2 or 3 yrs old, some (for example Yew) are 4 yrs old.	10-15cm = 4-6ins	60-90cm = 24-36ins
	15-20cm = 6-8ins	90-120cm = 3ft-4ft
RB= Root-balled. Larger field grown plants, lifted with well-developed roots and soil, which are then wrapped for protection.	20-30cm = 8-12ins	120-150cm = 4ft-5ft
	30-40cm = 12-16ins	150-180cm = 5ft-6ft
Pot= Pot grown plants.		
GROWTH RATES. We are often asked how quickly hedge plants will grow to form a hedge. Growth rates vary enormously depending on soil conditions, weed competition, feeding, watering etc. In general, given reasonable care, plants listed as 'medium-large' will grow between 30-60cm (1-2ft) per year, and small-medium will grow 15-30cm (6-12ins). Rates of growth may be slower in the first year but will speed up as the roots become established. As a guide, large hedges of about 5ft may take around 3-5 years to form, smaller hedges should establish in between 2 and 4 years from planting, depending on variety and initial size.

MIXED HEDGES For natural or informal areas, fields, paddocks and gardens, and for wildlife conservation.	SPACE APART in each row	TYPE	SIZE (cm) at despatch	PRICE per PLANT inc VAT FOR QUANTITIES SHOWN		
				20- 99	100- 249	250- 500
<u>TRADITIONAL MIXED NATIVE HEDGE</u> Most old field hedges are a mixture of different native species that have colonised the field boundary over many years. It is said that each variety represents 100 years of the hedge's life. This mixture is based on observations of traditional hedges around this part of East Anglia, and comprises of 6 species (or 600 years of history?): <i>Hawthorn 50%, Blackthorn 25%, Field Maple 10%, Oak 5%, Hazel 5%, Dog Rose 5%</i> Best planted randomly in a staggered double row (4-7 plants per metre)	30-45cm	Tr	40-60 60-90	0.68 0.78	0.63 0.73	0.58 0.68
<u>'EXOTIC' NATIVE MIX</u> A colourful mix of native plants, with more conspicuous flowers, berries and Autumn leaf colour, as an alternative to our traditional mixture. Great for wildlife conservation. 9 species: <i>Hawthorn 40%, Blackthorn 25%, Guelder Rose 5%, Spindle 5%, Common Dogwood 5%, Native Privet or Wayfaring Tree 5%, Sea Buckthorn 5%, Field Maple 5%, Scotch Rose 5%</i> Best planted randomly in a staggered double row (4-7 plants per metre)	30-45cm	Tr	40-60 60-90	0.71 0.81	0.66 0.76	0.61 0.71
<u>THORNLESS MIXED NATIVE HEDGE</u> Visually stunning and natural, this mix contains all thornless native species, suitable for use in school grounds, places where young children may have access or anywhere that thorns are not wanted! 5 species: <i>Hornbeam 50%, Field Maple 25%, Spindle 10%, Common Dogwood 10%, Hazel 5%</i> Best planted randomly in a staggered double row (4-7 plants per metre)	30-45cm	Tr	40-60 60-90	0.75 0.85	0.69 0.79	0.65 0.75
<u>TAPESTRY HEDGE</u> A mixed hedge made up of several species with similar growth patterns but contrasting leaf tones and colours through the seasons, to provide a vivid back-drop. Our mix consists of the following: <i>Common Beech 40%, Purple Beech 20%, Field Maple 10%, Golden Privet 10%, Cotoneaster franchetii 10%, Amelanchier lamarckii 10%</i> Single row – 3 plants per metre. Double row – 5 plants per metre.	30-45cm	Tr	40-60 60-90	1.35 1.59	1.29 1.55	1.25 1.49
<u>FRUIT and NUT HEDGE</u> A mixed hedge producing an array of edible fruit (which usually require some preparation) or nuts. They also make an attractive, colourful hedge which will benefit wildlife. <i>Myrobalan Plum 50%, Rosa rugosa 10%, Cornelian Cherry 10%, Hazel 10%, Sea Buckthorn 10%, Blackthorn (Sloe) 10%</i> Best planted randomly in a staggered double row (4-7 plants per metre)	30-45cm	Tr	40-60 60-90	0.79 0.89	0.75 0.85	0.69 0.79
<u>'FARMERS' ECONOMY FIELD MIX</u> A traditional field mix of 1yr seedlings: <i>Hawthorn 60%, Blackthorn 10%, Field Maple 10%, Dogwood 10%, Dog Rose 10%</i> Only available in multiples of 500	30-45cm	Sd	40-50	<u>500</u> £155	<u>1000</u> £290	<u>1500</u> £415

HEDGES and CONSERVATION

Mixed hedges are the best way to create a natural barrier that will blend with the surrounding countryside. In conservation terms hedgerows play a vitally important role as wildlife 'highways', nesting cover, and as a source of food. They can support up to 80% of our native woodland bird population, 50% of our mammals, 30% of our butterflies, and many, many species of insect – the grassy verge at the base of the hedge can also be home to reptiles and ground nesting birds.

Here are some Glebe Farm tips to maximise wildlife appeal:- Where space allows, plant a double row hedge (usually 5 plants per metre) as a wider hedge is of greater benefit to wildlife. If possible allow some of the plants to grow into trees which will act as platforms for songbirds and appeal to high nesting/roosting birds. Allow grass verges to establish at the base of the hedge and don't mow until late Summer. Avoid trimming the hedge until late Summer – you could try only trimming alternate sides of the hedge in alternate years, thus ensuring that you minimise disturbance and leave plenty of berry-bearing shoots for the Autumn/Winter.

We strongly recommend that you look at field hedges in your area and make up your own mix if ours are not suitable. For native species please choose from the species marked # on the following pages. Please ask us for advice on mixtures especially for horse paddocks or stewardship schemes.

MEDIUM TO LARGE GROWING HEDGE PLANTS. For a hedge of between 120-300cm (4-10ft) <i>(nb. If left unchecked many of these plants will grow much larger than 10ft)</i>	SPACE APART (single row)	TYPE	SIZE (cm) at despatch	PRICE per PLANT inc VAT FOR QUANTITIES SHOWN		
				10-99	100-249	250-500
<u>BEECH, COMMON</u> or <u>GREEN</u> (<i>Fagus sylvatica</i>). # Well known native deciduous tree, makes an excellent hedge. When kept trimmed, Autumn leaves are retained throughout winter. Good in all but very wet soils. For a thick hedge grow in a staggered double row (4-8 plants per metre). Clip in mid-late Summer.	30-45cm	Tr Tr Tr Tr Tr	40-60 60-90 90-120 120-150 150-175	1.09 1.45 2.10 2.75 4.99	1.05 1.39 2.05 2.69 4.89	0.99 1.35 1.99 2.65 4.79
<u>BEECH, PURPLE</u> or ' <u>COPPER</u> ' (<i>Fagus sylvatica purpurea</i>) # Stunning trees, making a striking hedge with deep purple leaves, olive then red when young and rich copper in Autumn. A natural sport of Common Beech. Works well when planted with Common Beech to create a colourful mixed hedge. Planting etc as above.	30-45cm	Tr Tr Tr Tr Tr	40-60 60-90 90-120 120-150 150-175	2.39 2.85 3.35 4.49 6.99	2.35 2.79 3.25 4.39 6.79	2.29 2.75 3.15 4.29 6.59
<u>BLACKTHORN</u> or <u>SLOE</u> (<i>Prunus spinosa</i>). # Native shrubby tree forming a dense impenetrable hedge. White flowers in early Spring, Sloe berries in Autumn. Good in a mixture or on its own, as a field or boundary hedge. Trim mid-late Summer. Suits most soils.	30-45cm	Sd Tr Tr Tr	30-40 40-60 60-90 90-120	----- 0.65 0.75 0.89	0.30 0.59 0.69 0.85	0.28 0.55 0.65 0.79
<u>BUCKTHORN, COMMON</u> (<i>Rhamnus cathartica</i>) # Native shrub useful in mixed hedgerows. Small yellow/green flowers in May and small black berries in Autumn. Host plant for Brimstone Butterflies	30-45cm	Tr	60-90	0.85	0.79	0.75
<u>BUCKTHORN, ALDER</u> (<i>Rhamnus frangula</i>) # Large deciduous native shrub with dark green glossy leaves which turn yellow in Autumn. Red berries in late Summer. Striking spotty bark. Host plant for Brimstone Butterflies.	30-45cm	Tr	60-90	0.85	0.79	0.75
<u>COTONEASTER DIVARICATUS</u> One of the best Cotoneasters for hedging. Rosy red flowers in Summer followed by red Autumn berries and foliage. Deciduous. Trim late Winter.	30-45cm	Tr	40-60	0.89	0.85	0.79
<u>COTONEASTER LACTEUS</u> Medium-large evergreen shrub. Leathery leaves with downy underside, white flowers followed by hanging clusters of red berries. Trim in late Winter.	45-60cm	Pot	20-30	3.99	3.89	3.79
<u>CORNELIAN CHERRY</u> (<i>Cornus mas</i>) Deciduous large shrub with abundant small yellow flowers on bare stems in late Winter, followed by bright red cherry like edible fruits. An interesting addition to a mixed hedge.	30-45cm	Tr	40-60	0.89	0.85	0.79
<u>DOGWOOD, NATIVE</u> (<i>Cornus sanguinea</i>) # Good in damp conditions. Winter stems flushed with red and Autumn leaves turn a rich wine red. Ideal in a mixed hedge.	30-45cm	Tr Tr	40-60 60-90	0.69 0.79	0.65 0.75	0.59 0.69
<u>ELM, WYCH</u> (<i>Ulmus glabra</i>). # Native elm, still common in hedges. Grow on its own or in mixed hedges. Leaves turn pale yellow in Autumn. Clip mid-Summer.	30-45cm	Tr Tr	40-60 60-90	0.79 0.89	0.75 0.85	0.69 0.79
<u>FIELD MAPLE</u> (<i>Acer campestre</i>). # Native tree ideal in a mixed hedge. Wonderful golden autumn colour. Clip July-August.	30-45cm	Tr Tr	40-60 60-90	0.69 0.79	0.65 0.75	0.59 0.69
<u>GUELDER ROSE</u> (<i>Viburnum opulus</i>). # Ideal shrub for a mixed native hedge with white flowers in summer and red berries & red leaves in Autumn. Tolerant of wet soils.	30-45cm	Tr Tr	40-60 60-90	0.69 0.89	0.65 0.85	0.59 0.79
<u>HAZEL</u> (<i>Corylus avellana</i>) # Another native, with catkins in winter/spring and nuts in Autumn. Best in a mixed hedge or coppice wood. Produces long straight poles that can be used for a variety of crafts.	30-45cm	Tr Tr	40-60 60-90	0.85 0.95	0.79 0.89	0.75 0.85
<u>HAWTHORN</u> or <u>QUICKTHORN</u> (<i>Crataegus monogyna</i>). # Thorny native shrubby tree, traditional field, or boundary hedge. White flowers in Summer, followed by Autumn berries. Grows in almost any soil. For a thick hedge plant in double rows (4-8 plants per metre). Trim in mid to late Summer.	30-45cm	Sd Tr Tr Tr	30-40 40-60 60-90 90-120	----- 0.65 0.75 0.89	0.30 0.59 0.69 0.85	0.28 0.55 0.65 0.79
<u>HOLLY</u> (<i>Ilex aquifolium</i>). # Hardy evergreen with prickly glossy green leaves. Forms a dense barrier when grown as a hedge. Female plants produce bright red berries in late Autumn/Winter. Trim late Summer. <i>NB Larger rootballed plants available to order October-March. See Page 6</i>	45-60cm	Pot Pot Pot	30-40 40-60 60-90	2.35 2.85 7.25	2.25 2.75 7.15	2.15 2.65 6.99
<u>HORNBEAM</u> (<i>Carpinus betulus</i>) # Similar to Beech, but tolerant of wet soil conditions. Soft green leaves turn pale bronze in Autumn and are retained through Winter. One of the best trees for pleaching (hedge on stilts). For a really thick hedge plant in double rows (4-8 plants per metre). <i>NB. Larger bare-root, feathered plants to order. See Page 6</i>	30-45cm	Sd Tr Tr Tr	30-40 40-60 60-90 90-120	----- 0.75 0.85 1.49	0.39 0.69 0.79 1.39	0.35 0.65 0.75 1.35
<u>LAUREL, COMMON</u> (<i>Prunus laurocerasus</i>). Large evergreen with glossy leaves. Allow plenty of space for this one, as it should be grown at least 1m wide. Good in shade. Clip with secateurs in mid-Summer (avoid cutting leaves). <i>NB. Larger root-balled plants to order November-March. See Page 6</i>	45-90cm	Tr Tr Pot	30-40 40-60 40-60	1.85 2.25 4.49	1.79 2.15 4.39	1.75 2.05 4.29
<u>LAUREL, PORTUGUESE</u> (<i>Prunus lusitanica</i>) Evergreen leaves on reddish stems. Hardy and tolerant of shade. Trim Spring or Autumn. <i>NB. Larger root-balled plants to order November-March. See Page 6</i>	45-60cm	Pot Pot Pot	20-30 30-40 50-60	1.85 4.25 7.25	1.79 4.10 7.15	1.75 3.99 6.99

				10-99	100-249	250-500
LEYLANDII GREEN (Cupressocyparis leylandii). Notoriously fast growing conifer with glaucous green foliage. A very useful screening plant if used in the right location and clipped regularly. Spacing will depend on ultimate height required. Clip mid- Summer and early Autumn. <i>NB. Larger root-balled plants up to 2m available to order October-March. See Page 6</i>	45-90cm	Pot Pot	25-30 60-90	1.85 5.95	1.79 5.75	1.75 5.65
LEYLANDII CASTLEWELLAN GOLD (Cupressocyparis). Similar growth rate to Green Leylandii, with fresh bright new foliage changing to a rich gold in Autumn and Winter. <i>NB. Larger pot grown plants up to 2m available to order October-March. See Page 6</i>	45-90cm	Pot Pot	25-30 60-90	1.85 5.95	1.79 5.75	1.75 5.65
OAK, HOLM or EVERGREEN (Quercus ilex). Dark green foliage makes a superb hedge. May need wind protection when young. Good in coastal areas. Clip in late Autumn.	45-60cm	Pot	50-80	6.25	6.15	6.05
PLUM, MYROBALAN (Prunus cerasifera). Thorny hedge plant. Pure white flowers bourne on bare branches in early Spring followed by edible small fruit in Autumn.	30-45cm	Tr	60-90	0.79	0.75	0.69
PRIVET, NATIVE (Ligustrum vulgare). # Native semi-evergreen privet with dark lanceolate leaves and white flowers in Summer, followed by black berries in Autumn. Excellent in shade and poor soils. Clip in mid Summer.	30-45cm	Tr Tr	40-60 60-90	0.75 0.85	0.69 0.79	0.65 0.75
PRIVET, COMMON GREEN (Ligustrum ovalifolium). Quick growing (semi) evergreen that will thrive in most situations. Clip in June and September to keep in shape. Often planted in a staggered double row. (4-8 plants per metre)	30-45cm	Tr Tr Pot	40-60 60-90 40-60	0.75 0.85 2.99	0.69 0.79 2.89	0.65 0.75 2.79
PRIVET, GOLDEN (Ligustrum ovalifolium 'aureum'). Brightly coloured golden foliage. Not as fast as green form, but twice a year clipping recommended. Semi-evergreen	30-45cm	Tr Pot	40-60 30-40	1.99 3.25	1.89 2.99	1.79 2.89
ROSE, DOG (Rosa canina). # Fast growing native rose with single pale pink flowers and bright orange hips. Best in a mixed hedge.	30-45cm	Tr Tr	40-60 60-90	0.69 0.79	0.65 0.75	0.59 0.69
ROSE, GLAUCA (Rosa glauca, syn. rubrifolia). Glaucous grey foliage with red underside. Clear pink flowers in Summer and red hips in Autumn. Can be grown on its own or in a mixed hedge. Trim in late Winter.	30-45cm	Tr	40-60	0.85	0.79	0.75
ROSA RUGOSA RUBRA. Thorny rose, ideal for hedging. Strongly scented single deep pink flowers in Summer, followed by large red hips in Autumn. Cut back in late Winter.	45-60cm	Tr	40-60	0.85	0.79	0.75
ROSA RUGOSA ALBA As above, but with pure white, papery flowers.	45-60cm	Tr	40-60	0.85	0.79	0.75
ROSE, SCOTCH or BURNET (Rosa pimpinellifolia). # Unusual fern-like leaves, pale yellow occasionally bi-coloured flowers, and dark plum hips make this native an intriguing addition to a mixed hedge. Trim in late Winter.	30-45cm	Tr	40-60	0.85	0.79	0.75
SEA BUCKTHORN (Hippophae rhamnoides) # Native plant for mixed hedges. Silvery leaves and edible orange Autumn berries. Good in most situations, esp. coastal regions.	30-45cm	Tr Tr	40-60 60-90	0.79 0.89	0.75 0.85	0.69 0.79
SPINDLE (Euonymus europaeus) # Fast growing native shrub for mixed hedges. Unusual small pinky red flowers with orange centres and rich Autumn leaf colour. Especially good on chalky soils	30-45cm	Tr Tr	40-60 60-90	0.69 0.79	0.65 0.75	0.59 0.69
SNOWBERRY (Symphoricarpos albus 'White Hedge') Upright deciduous shrub producing a mass of pearl white clusters of berries in Autumn and Winter. Excellent as a hedge in shade or under trees. Prune back in early Spring	45-60cm	Tr	40-60	0.75	0.69	0.65
WAYFARING TREE (Viburnum lantana) # Large native shrub with soft, 'hairy' leaves and white Spring flowers, followed by dark red berries. Good Autumn colour. An interesting addition to a mixed hedge.	30-45cm	Tr	40-60	0.85	0.79	0.75
WESTERN RED CEDAR (Thuja plicata atrovirens). Vigorous conifer often grown as an alternative to Leyland Cypress in heavy soils. Foliage is apple scented when cut or crushed. Clip in June/ July and again in September. <i>NB. Larger root-balled plants up to 2m are available to order October-March. See Page 6</i>	45-90cm	Pot Pot	20-30 40-60	1.85 6.99	1.79 6.89	1.75 6.59
YEW, ENGLISH (Taxus baccata). # The best large hedge for formal gardens. Dark evergreen leaves, pale when young, create a perfect background. Responds well to hard pruning. Fast growing if nurtured in the first few years after planting. Excellent for large-scale topiary schemes. Trim in August. <i>NB. Larger root-balled plants up to 2m are available to order October-March. See Page 6</i>	45-60cm	Tr Tr Tr Pot	20-30 30-40 40-60 30-40	2.59 2.89 3.15 4.99	2.55 2.85 3.10 4.89	2.49 2.79 2.99 4.79

<u>BOX DWARF</u> (Buxus semp. suffruticosa) Very slow growing form, ideal for edging and intricate 'knot' patterns. Trim mid Summer	15-20cm	Pot	10-15	2.49	2.45	2.39
<u>BERBERIS, GREEN</u> (Berberis thunbergii). Spiny, deciduous plant with olive green leaves which turn crimson red in Autumn. Small yellow flowers in Spring, then red berries in Autumn. Clip in early Summer, after flowering.	30-45cm	Tr	40-60	1.15	1.09	1.05
<u>BERBERIS, PURPLE</u> (Berberis thunbergii atropurpurea). Slightly more compact form. Leaves are pale red when young, turning rich purple in Summer, then crimson pink in Autumn. Otherwise as above.	30-45cm	Tr	40-60	1.15	1.09	1.05
<u>BERBERIS JULIANAE</u> Vigorous spiny, evergreen variety with scented yellow Spring flowers.	30-45cm	Tr	30-40	1.49	1.45	1.39
<u>COTONEASTER FRANCHETII</u> Graceful variety for an informal hedge. Evergreen grey/green leaves with pale underside. White-pink Summer flowers, followed by orange Autumn berries. Trim late Winter	30-45cm	Tr	40-60	0.89	0.85	0.79
<u>COTONEASTER SIMONSII</u> Semi-evergreen, with white Summer flowers and scarlet Autumn berries. Leaves also colour well in Autumn. Trim late Winter	30-45cm	Tr	40-60	0.99	0.95	0.89
<u>ESCALLONIA RUBRA</u> var. <u>MACRANTHA</u> Evergreen with pink/red Summer flowers. Good in coastal regions. Trim late Summer	30-45cm	Pot	15-20	1.85	1.79	1.75
<u>ILEX CRENATA CONVEXA</u> (Japanese Holly) Slow growing evergreen, suitable for low hedges and edges. Useful alternative to Box or Dwarf Box. Clip in mid Summer.	20-30cm	Pot	8-10	1.99	1.89	1.79
<u>ILEX CRENATA 'CAROLINE UPRIGHT'</u> (Japanese Holly) Slow growing evergreen plant with small mid green oval leaves, similar in appearance to Box. This variety has an upright growth habit making it ideal for edging. Clip in mid Summer	20-30cm	Pot	10-15	1.99	1.89	1.79
<u>LAVENDER MUNSTEAD</u> (Lavandula angustifolia) Compact with mid-grey foliage and mauve/blue flowers. Trim in Spring and after flowering.	20-30cm	Pot Pot	8-10 10-15	1.85 2.75	1.79 2.60	1.75 2.50
<u>LAVENDER, HIDCOTE</u> (Lavandula angustifolia Hidcote). Fairly dwarf variety with silver/grey foliage and deep purple flowers. Evergreen and scented, it's happiest in a sunny, well-drained position. Trim in Spring and again after flowering.	30-45cm	Pot Pot	8-10 10-15	1.85 2.75	1.79 2.60	1.75 2.50
<u>LAVENDER, ENGLISH</u> (Lavandula spica). Larger variety of lavender, with tall pale blue flowers. Otherwise as before	45-60cm	Pot	8-10	1.85	1.79	1.75
<u>LAVENDER, DUTCH</u> (Lavandula vera) Tall variety with long mauve/blue flowers, and neat grey foliage.	45-60cm	Pot	8-10	1.85	1.79	1.75
<u>LAVENDER, IBERIAN</u> (Lavandula stoechas pedunculata). Unusual, highly attractive and richly scented variety with rose/purple 'ears' or bracts. Best in a sheltered, well-drained position. May need protection in severe Winters.	30-45cm	Pot	8-10	1.85	1.79	1.75
<u>LONICERA NITIDA</u> Fast growing alternative to Box, with dark green foliage. Forms a dense evergreen hedge. For formal hedges frequent trimming is required, normally in Spring and late Summer.	30-45cm	Tr	30-40	0.95	0.89	0.85
<u>LONICERA NITIDA BAGGESEN'S GOLD</u> Slightly less vigorous form with bright golden foliage. Otherwise as above.	30-45cm	Pot	8-10	1.85	1.79	1.75
<u>ROSEMARY, COMMON</u> (Rosmarinus officinalis). Richly aromatic evergreen shrub and culinary herb. Makes a fantastic low hedge. Pale blue flowers from late Spring. Best in a sunny well drained spot. Trim in Spring and late Summer.	30-45cm	Pot	8-10	1.85	1.79	1.75
<u>ROSEMARY, MISS JESSOP'S UPRIGHT</u> (Rosmarinus officinalis). As above with an upright habit and intense blue flowers.	30-45cm	Pot	8-10	1.85	1.79	1.75
<u>SANTOLINA, LAMBROOK SILVER</u> (Santolina chamaecyparissus) The best silver form of Cotton Lavender. Forms a good low hedge, ideal for edging paths and in-filling parterres and knots. Bright yellow button flowers in mid Summer. Best in a sunny, well-drained position. Trim in Spring and late Summer.	30-45cm	Pot	8-10	1.85	1.79	1.75
<u>SANTOLINA, PRIMROSE GEM</u> (Santolina rosmarinifolia). Compact variety with rich green foliage and creamy yellow flowers.	30-45cm	Pot	8-10	1.85	1.79	1.75

WOODLAND and HEDGEROW TREES AND SHRUBS. (# = Native Species)	Estimated height in 10 years	TYPE	SIZE (cm) At despatch	PRICE per PLANT inc VAT FOR QUANTITIES SHOWN		
				10- 99	100- 249	250- 500
<u>ALDER, COMMON</u> (<i>Alnus glutinosa</i>) # Medium sized tree with yellow Spring catkins, best grown in wet soils. Will thrive on poor ground and even standing water.	3-4 metres	Tr	90-120	0.95	0.89	0.85
<u>ALDER, ITALIAN</u> (<i>Alnus cordata</i>) Large tree with early Spring catkins and glossy dark green leaves contrasted by pale undersides. Makes a good wind-break. Grows well on most soils.	3-4 metres	Tr	90-120	0.95	0.89	0.85
<u>AMELANCHIER LAMARCKII</u> Prized for its white early Spring flowers and stunning Autumn colour. Grows well on most soils. Interesting addition to a mixed hedge.	3-4 metres	Tr	60-90	0.95	0.89	0.85
<u>ASH</u> (<i>Fraxinus excelsior</i>) # Fast growing native tree valued for its timber. Coppices well. Leaves fall at the first Autumn frost. Does best on heavy rich soils.	4-6 metres	Tr	90-120	0.95	0.89	0.85
<u>BIRCH, SILVER</u> (<i>Betula pendula</i>) # Graceful native woodland tree with silver striated bark in older trees. Leaves turn pale yellow in Autumn. Grows well in most soils.	3-5 metres	Tr	90-120	0.95	0.89	0.85
<u>BIRCH, PAPER BARK</u> (<i>Betula papyrifera</i>) Beautiful form with peeling silver/white papery bark in older trees.	3-5 metres	Tr	90-120	1.09	1.05	0.99
<u>CHESTNUT, HORSE</u> (<i>Aesculus hippocastanum</i>) A familiar majestic specimen tree with its white candle flowers and conkers. Timber is of little value. Frequently used for avenues or a woodland edge.	2-4 metres	Tr	60-90	1.99	1.89	1.79
<u>CHESTNUT, SWEET</u> (<i>Castanea sativa</i>) Long-lived tree that thrives in drier soils. Coppices well for firewood or fencing stakes. Edible chestnuts in Autumn.	3-5 metres	Tr	60-90	1.25	1.15	1.09
<u>CRAB APPLE</u> (<i>Malus sylvestris</i>) # Wild crab with pale pink flowers in Spring and coloured fruits in Autumn, suitable for jam making. For hedgerows and woodland edges.	3-4 metres	Tr	90-120	0.95	0.89	0.85
<u>DOGWOOD, RED STEMMED</u> (<i>Cornus alba sibirica</i>) Thicket forming shrub grown for its brilliant red stems in winter. For best results prune back hard every March. Will grow in most soils.	2-3 metres (if unpruned)	Tr	60-90	0.95	0.89	0.85
<u>DOGWOOD BLACK STEMMED</u> (<i>Cornus alba kesselringii</i>) Winter stems dark purple to black. Mixes well with other varieties when planted in drifts.	2-3 metres (if unpruned)	Tr	60-90	0.95	0.89	0.85
<u>DOGWOOD, 'YELLOW STEMMED'</u> (<i>Cornus s. flaviremea</i>) As above but with striking ochre to olive-green Winter stems, especially dramatic when planted with Red-stemmed Dogwood. Best on damp soils.	1-2 metres	Tr	60-90	0.95	0.89	0.85
<u>LIME, BROAD LEAVED</u> (<i>Tilia platyphyllos</i>) Suitable for pleaching or avenue planting. Winter stems tinged red	2-4 metres	Tr	90-120	1.89	1.79	1.75
<u>LIME, SMALL LEAVED</u> (<i>Tilia cordata</i>) # Excellent native tree for formal avenues and pollarding. Also suitable for woodland planting but has little timber value.	3-4 metres	Tr	90-120	1.29	1.25	1.19
<u>MOUNTAIN ASH or ROWAN</u> (<i>Sorbus aucuparia</i>) # Small native tree with white flowers followed by bunches of bright orange berries. Will grow well in almost any soil.	2-4 metres	Tr	90-120	0.95	0.89	0.85
<u>OAK, ENGLISH</u> (<i>Quercus robur</i>) # English oak is a staple of many natural hedges and renowned as a wildlife attractor. Left unchecked will eventually grow into a majestic tree, capable of living over 1000 years.	2-4 metres	Tr Tr Tr	40-60 60-90 90-120	0.89 0.99 1.69	0.85 0.95 1.65	0.79 0.89 1.59
<u>OAK, RED</u> (<i>Quercus rubra</i>) Fast growing oak, good on drier soils. Large decorative leaves turn brilliant red in Autumn	3-4 metres	Tr	90-120	1.89	1.79	1.75
<u>OAK, SESSILE</u> (<i>Quercus petraea</i>) # Our second native oak. A better choice for wet soils and coastal regions.	2-4 metres	Tr	60-90	1.29	1.25	1.19
<u>PINE, SCOTS</u> (<i>Pinus sylvestris</i>) # Fast growing native pine, frequently used as a 'nurse' in woods to force hardwood trees to grow straight. Good cover and habitat for wildlife.	2-4 metres	Tr	30-40	1.15	1.09	1.05
<u>WILD CHERRY</u> (<i>Prunus avium</i>) # Native cherry with pure white flowers, followed by small fruit. Leaves turn crimson in Autumn. Richly coloured bark. Thrives on all but very wet soils.	2-4 metres	Tr	90-120	0.99	0.95	0.89
<u>WILLOW, GOLDEN</u> (<i>Salix alba vitellina</i>) Fast growing willow grown principally for its yolk-yellow shoots in Winter. Prune to a stump in Spring every 2 years for the best effect. Prefer damp soils.	4-6 metres	Tr	60-90	0.69	0.65	0.59
<u>WILLOW, SCARLET</u> (<i>Salix alba Britzensis</i>) As above but with brilliant orange-scarlet stems. Prune in Spring every 2 years to a stump. Will grow in most situations but prefer damp soils.	4-6 metres	Tr	60-90	0.69	0.65	0.59
<u>WILLOW, OSIER</u> (<i>Salix viminalis</i>) # Native willow long used for basket making etc. Can also be grown as 'living structures'.	4-6 metres	Tr	60-90	0.69	0.65	0.59
<u>WILLOW, TWISTED</u> (<i>Salix matsudana Tortuosa</i>) Bizarre form with corkscrew branches, which are highly decorative when cut. Prefers damp soils.	3-4 metres	Tr	60-90	0.99	0.95	0.89
<u>WILLOW, VIOLET</u> (<i>Salix daphnoides</i>) Fast growing with purple/black young shoots, overlaid with white 'bloom'. Prune every 2 years for best effect.	4-6 metres	Tr	60-90	0.69	0.65	0.59

GLEBE FARM HEDGING

HEDGING ACCESSORIES AND SUNDRY ITEMS

When planting a new hedge we would always recommend the following where practical: mulch fabric along the length of your hedge to suppress weeds and retain soil moisture at the roots, porous pipe or drip tape under the landscape fabric to provide direct watering which is vital in the first two growing seasons, spiral guards or wire netting to protect against rabbit/hare/deer attack, and "Rootgrow" to enhance speedy establishment of bare-root plants.

HEAVY DUTY LANDSCAPE FABRIC 1 Made from long lasting woven polypropylene. Suppresses weeds, retains moisture and allows rain water through. Ideal size for most hedges Width 50cm	Per metre 100m roll	£0.69 £59.95	POROUS PIPE or SEEP HOSE Made from recycled rubber. Watering rate of between 1-4 litres /metre/hour depending on water pressure and length of run. Supplied with essential fittings and instructions.	Per metre (10m minimum) 50m roll	£1.95 £89.95
HEAVY DUTY LANDSCAPE FABRIC 2 For hedging, paths, or narrow borders. Width 100cm	Per metre 100m roll	£0.95 £89.95	DRIP TAPE or T-TAPE Thin walled plastic piping with regulated drip holes at 20cm spacings, for laying on surface or under ground. Watering rate of approx. 1 litre /metre/hour. Useful for runs of 50m +. Supplied with essential fittings and instructions.	Per metre (40m minimum)	£0.49
HEAVY DUTY LANDSCAPE FABRIC 3 For larger scale planting schemes, and weed suppression in gravel gardens etc. Width 200cm	Per metre 50m roll	£2.20 £99.00			
GROUND STAPLES 6" metal staples for pegging down landscape fabric and other mulch fabrics.	Per 10 Per 100	£3.49 £29.95	WINDBREAK NETTING Made from translucent green woven polyethylene. Use to protect delicate plants in exposed sites.	50m roll x 1m wide	£89.95
NATURAL HEMP MULCH FABRIC Made from UK grown hemp fibre. Fully biodegradable, with excellent water retaining, soil warming and weed suppressing qualities. Simply cut holes for planting or cut into squares to mulch round trees. Width 100cm.	25m roll	£95.00	SPIRAL GUARDS Economic protection from rabbit, hare, strimmer and chemical damage. All our guards are made from transparent UV resistant recycled plastic. <i>NB Always use with 3' or 4' canes</i>	18" guard 24" guard	£0.23 £0.26
BLACK PLASTIC MULCH Photodegradable polythene on a roll.	200m x 1m	£99.00	TUBEX STANDARD TREE GUARDS Opaque green rigid plastic tree guards. <i>NB. Stake or cane req'd.</i>	60cm high	£1.20 each
CANE SUPPORTS Useful for supporting young plants against wind rock in exposed locations and for ensuring straight growth	3' each 4' each	£0.12 £0.16	MESH GUARDS Plastic mesh for protection of bushier plants, such as pine, holly etc., where spirals can't be used. <i>NB Cane req'd.</i>	60cm high x 20cm	£0.95
HARDWOOD STAKES Long-lasting 2.5cm x 2.5cm square pointed stakes for supporting young trees, windbreak net or temporary support for wire fencing.	120cm	£0.85	WIRE NET FENCING Galvanised wire netting for fencing along the length of your hedge, for the best protection against rabbit, hare, and deer attack. Available in 50m rolls.	Height 105cm	£/ roll £74.95
Rootgrow™ Beneficial mycorrhizal fungi root dip. Use at planting to enhance root growth, increase drought resistance and speed establishment. One pack treats up to 125 transplants. <i>Endorsed by The Royal Horticultural Society.</i>				360 gram pkt	£10.99

TERMS AND CONDITIONS

HOW TO ORDER. Either order online at www.hedge-plants.co.uk or fill in all details of your requirements on the order form provided and send it together with your remittance to the address on the form. We can also accept orders by telephone or fax if payment is made by credit/debit card (we do not advise sending credit card details by e-mail). We do not charge your card until the day of despatch. We will confirm your order and delivery date by post, e-mail, fax or telephone, depending on lead time. The minimum order value is £20 excluding carriage charges. Please note that plants marked as *Tr (transplants), Sd (seedlings) or Rootballed* are only available from November to early April.

DESPATCH. Plants are despatched as soon as possible after receipt of orders, but in November and March there may be delays in sending plants due to the volume of orders. Normal lead times are between 7-10 days. Please notify us as soon as possible if your order has not been received on your expected delivery date. We will advise you if your order cannot be sent because of adverse weather conditions etc

CARRIAGE AND PACKING. Orders are sent on a contract carrier next day service and are delivered on weekdays (Tuesday-Friday). Please note that although we make every effort to ensure that orders are delivered on a pre-arranged date, this is not a guaranteed or timed service, so we would ask that you let us know where packages can be left if you are out when the delivery arrives. For delivery to UK mainland destinations the standard charge for next day service is £9.95 per order. Saturday and timed deliveries can be arranged at extra cost. If delivery is required to Northern Ireland, The Channel Islands, or other offshore destinations please ask for a quote. Please note that for mature 'instant' hedge plants, carriage is calculated by weight or by pallet load. Please ask for details.

COLLECTION OF ORDERS. Customers are welcome to come and collect pre-booked orders, by prior arrangement. All plants are lifted and packed to order, so please give us at least 2 days notice if you intend to collect. Normal office hours: Mon-Fri 9.00am-5.00pm and Sat 9.00am-Midday

AVAILABILITY. If any plant is not available we will notify you as soon as possible after receipt of your order. Unless asked to do so we do not send substitutes.

PRICES. List prices are correct at the time of printing, but may be subject to change without notice. All list prices include VAT at the prevailing rate where applicable.

SIZES. All sizes quoted are accurate to the best of our knowledge at the time of printing, but should be regarded as approximations.

CARE OF PLANTS. Full care instructions and advice on preparation for receipt of your order will be sent with your order confirmation or with the order itself.

POISONOUS PLANTS. The following listed plants are known to contain toxins, which may be harmful to humans and animals: **Yew (Taxus baccata)**- CAUTION toxic if eaten; **Leyland Cypress (Cupressocyparis leylandii)**- May cause skin allergy; **Privet (Ligustrum- all types)**- Harmful if eaten; **Laurel, Common & Portuguese (Prunus laurocerasus & lusitanicus)**- Seed kernels harmful if eaten; **Rhamnus cathartica & frangula** - Harmful if eaten. Other listed plants may have harmful effects depending on levels of exposure/consumption. If planting in situations where grazing/browsing animals may have access, please ask for advice.

CLAIMS FOR DAMAGES IN TRANSIT. Please unpack and inspect your plants carefully as soon as you receive them. In the event of shortages or damage to plants or goods in transit, please notify us within 3 days of receipt. We cannot accept responsibility if these conditions are not met.

GUARANTEE. All our plants and goods are guaranteed in good condition when despatched, but if for any reason you are dissatisfied on receipt of order please inform us within 3 days of receipt and we will arrange for goods to be collected. We will then either replace the goods or refund the purchase price of those goods. We cannot normally be held responsible for losses after this time, as there are too many factors beyond our control, however, in the unlikely event of plants failing to break dormancy in the first growing season, we will replace with plants of the same size in the following season. We will not replace plants that have failed due to neglect, physical or chemical damage, or adverse soil or weather conditions. This does not affect your statutory rights.

PRIVACY. We do not pass on personal details to any third party, except for delivery purposes.
